LIVE LIFE SAFE

Benefits of the Mobile App

Convenience

Easy communication from a single device.

Quick to install

Simple to download ready for immediate use.

Clear status screen

Where lone workers view and update their current status throughout the day.

Easy layout

Clearly displayed buttons for ease of use.

Suitable for:

- ✓ Outdoor lone working with access to strong, reliable mobile phone reception
- ✓ Environmental based risks
- ✓ High risk tasks or hazardous sites

Safe, simple, secure

Key features

Check-in:

Lone worker clocks on at start of work period.

Proof of Life:

Regular Welfare checks for lone workers to confirm they are safe.

Check-out:

Lone worker clocks off to stop monitoring when lone working activities end.

Reminders:

Reminds a lone worker to “Check-in” to confirm they are OK.

ASSIST

Assist feature:

To request help in a non-emergency situation e.g. a broken down vehicle or a minor injury.

Automatic alerts:

Sent to Notification Contacts e.g. lone worker fails to Check-in or requests Assistance.

Low signal mode:

Automatically switches to use SMS if mobile phone coverage is poor.

Accurate location monitoring:

Each message received with GPS position to aid emergency response.

GPS signal strength:

To check mobile phone GPS signal strength before sending a message.

1 Hour High Risk:

Timed activity records location at start and end of a hazardous activity or visit.

Drive:

Use at start and end of a journey.

Onsite / Leave site:

Use when lone working across multiple sites.

Customisable features:

For specific tasks your lone workers undertake.

Privacy:

Only shares lone worker's location when proactively sends a message. Balances safety and privacy.

What is the Trackplot Portal?

This is the online platform, accessible 24/7, where you monitor the location, activity and safety of your workforce.

Brings peace of mind
